INFORMATION.

LOCATION.—The College is situated in the suburbs of Bridgewater, Virginia, a thriving town of about one thousand inhabitants, on the Chesapeake and Western Railroad. Students coming over the Norfolk and Western change at Elkton, those over the Baltimore and Ohio or Southern change at Harrisonburg, for Bridgewater. This is one of the most beautiful and fertile parts of the great Shenandoah Valley. It is over twelve hundred feet above the sea level. The most eastern range of the Alleghanies stretches blue and beautiful in the distant western horizon, while gleams of the Blue Ridge, twenty miles eastward, now and then rise to view.

The College grounds comprise about ten acres, and the athletic field, a little distance away, contains three acres. The grounds are well elevated and well drained and insure dryness and healthfulness at all seasons.

The College has at present four large buildings and a central heating plant, and a fifth is expected to be completed by September 1st.

STANLEY HALL is the chief home of the Preparatory Department, and it also contains the Commercial and Shorthand and Music Departments. Its recitation rooms have recently been equipped with new, modern, tablet-arm settees and other furniture. The Commercial Department has well-arranged banks and exchange and practice offices. The typewriters have a good room and late, modern machines. Here are also the light and cheerful music studios, and the organ, clavier and piano-practice rooms, besides large rooms for vocal classes, harmony, music history, etc. This building also contains the Assembly Hall or Chapel.

FOUNDERS' HALL was completed in 1904, and is equipped throughout with new, modern furniture. In it are the College

Offices, the Trustee Room, the large, well-lighted Library, the recitation rooms of higher Mathematics and Modern Languages, Greek and Latin, Biblical subjects and History, the Chemical and Physical Laboratories and Storage Room, the Museum and the Victorian and Virginia Lee Literary Society Halls.

THE NEW DORMITORY or hall of residence for lady boarding students, is now being erected, and, it is hoped, will be ready for occupancy by the opening of the session of 1905-06. This is a splendid brick structure, with well-lighted, comfortable rooms, baths, etc., and large parlor. At least one professor and his wife reside in the building and take kindest care of the young ladies.

WARDO HALL, the young men's hall of residence, is laid out into living rooms for the young men. This gives them a quiet, pleasant home, where they can pursue their studies without being interrupted by the confusion occasioned by recitations and class changes. The rooms are comfortable, and supplied with the necessary furniture. The interior has been greatly improved. Several teachers occupy rooms in this building and the young men have constant access to them in their studies.

WHITE HOUSE, the ladies' hall of residence, contains the large college dining hall, kitchen, store rooms, steward's rooms, etc., and music studio and music-practice rooms. The remainder of the building is divided into rooms for the young ladies, together with bath room, etc., with hot and cold water. The rooms are furnished and carpeted. *A lady of experience resides in the building with the young ladies.* This building will be used till the new dormitory is completed.

CENTRAL HEATING PLANT, completed in 1904, embraces a boiler house and coal bin, and a sixty-four-foot brick stack or chimney. From the boiler house large pipes run underground to the buildings and thence ramify to the radiators. All the buildings are heated by steam.

WATER.—Fresh and abundant water is supplied to all the buildings.

DESIGN.—The aim of the institution is to provide a college home for the children of the German Baptist Brethren or Dunkards, under guarded moral and religious influence. Although thus originated and controlled, the school offers a hearty welcome to all young persons who seek a thorough and useful education, regardless of sect or creed.

RELIGIOUS EXERCISES.—*All students* are expected to attend: (1) Chapel exercises, 8:40 to 9 a. m. each school day; (2) Bible classes, 2 to 3 p. m. each Sabbath; (3) preaching in chapel each Sabbath evening. All students are also heartily invited to attend (1) the students' mission meeting, 7 to 8 o'clock, Wednesday evenings, and (2) students' prayer meeting, 9 to 10 a. m. The highest end to be reached in education is the development of Christian character.

LIBRARY.—The College Library contains about four thousand volumes. Besides, each of the two literary societies has its own library, as do the Mission Society and the Bible Department. These additions augment the number of volumes to about 5,000. All these are accessible to our students, who are encouraged to broaden and deepen their knowledge by as much research as possible. The Librarian is in the library from 8 to 11 a. m., and from 1 to 5 p. m. each work day. *Friends of the College are earnestly urged to assist in enlarging the library by donating either books or money.* All such contributions will be labeled with the donor's name. For a list of the donations made during the past session see page 73.

LABORATORY.—The new laboratory for the classes in Chemistry and Physics contains working tables for twelve students at once. The apparatus has been increased from time to time, and affords a good working outfit for students of these subjects.

MUSEUM.—Through the unforgetting kindness of friends and patrons, the College has been enabled to make a very respectable beginning toward a museum. The cases now contain over five hundred specimens and are of such a character as to fairly well illustrate such a knowledge of Geology and Mineralogy as

should be possessed by a well educated man. A good sized room in Founders' Hall has been set apart for this department of science, and the attention of the friends of the College is kindly called to the future needs of the Museum. Specimens of ores, petrified leaves, fossils, sand stones, coals, slates, marbles, granite, etc., are found in many localities, and can be collected at a small cost. On being donated they will be labeled with the donor's name and address, and will remain a permanent memorial of his thoughtful care and benevolence. For a list of recent donations see page 74.

LITERARY SOCIETIES.—Well-conducted literary societies are most valuable adjuncts to practical education. Emergencies are constantly arising in life when it is necessary to speak or read in public. Power to do this clearly and forcibly is attained only by practice. The Virginia Lee and the Victorian are two carefully conducted literary societies under the supervision of the Faculty, meeting on Friday evenings in their respective halls. From these two societies, students of sufficient merit and advancement are promoted to the Acme Society, on the recommendation of the Faculty. All this work is intended to cultivate a taste for the best literature and for chaste and strong methods of expression. The Instructor in Elocution and other members of the Faculty assist students in their preparation by repeated rehearsals. Special public programs are occasionally given. Each society has its own hall, well furnished. Prizes are awarded to successful contestants in readings and oratory.

PUBLICATIONS.—The publications of the College are: (1) *The Philomathean Monthly* and (2) *College Life*. *The Philomathean Monthly* is a modest journal of pure literature published by the two literary societies. Its aim is twofold: First, to offer a medium for the preservation, in permanent form, of the best thoughts of the members, and for the cultivation of a chaste and graceful literary style; and second, to unite in kindly remembrance and active interest all members of the societies, old and new. *College Life*, a quarterly, is conducted chiefly by members of the Faculty. It aims to encourage young men and young women everywhere to secure as good education as possible, and to keep

the alumni and other friends of the institution in closest and most cordial touch with the needs and progress of the College.

GOVERNMENT.—All students of the College are presumed to be ladies and gentlemen. They are urged to carefully inspect their own conduct, to aim constantly at higher ideals in deportment as well as in morals. A few simple regulations, believed to be mutually helpful to all, are prescribed, to which all students are expected to yield a prompt, ready obedience. It is the earnest wish of the Faculty to assist students in every way, to be regarded as their steadfast friends. Yet, whenever for any reason we are satisfied that the presence of any student is injurious to his fellows or the school, we shall refund the proportionate part of his fees and require his withdrawal.

GENERAL EXPENSES.

Board (including steam heat, light and furnished room), per session, \$93.00; per term, \$33.00; per month, \$11.50.

ENDOWMENT.

Colleges are not money-making institutions. They are charitable to a large degree. For this reason, the schools that exert the most influence are those that are heavily endowed. The endowment of the several chairs in our College is essential to the best results, and the high purpose for which the institution was founded can not be achieved without it. Education is a matter of general interest and concern to the church as well as to the State. If the State supports her institutions of learning by compulsory taxation, the church must support hers by voluntary contributions. It is very important that the friends of Christian education should remember these points when dispensing their wealth for charitable purposes, since the question of proper and thorough training is of such vital importance in the promulgation of the noblest religious sentiment.

A liberal endowment aids the work in a number of ways. In the first place, the endowment of chairs secures specialized work. A second advantage obtained is, that the best teachers are secured. In the third place, endowment of chairs secures to the incumbents the time and the incentives necessary for a constant research and preparation for their work. Finally, if a chair is endowed, it is possible to make the tuition free, or nearly so, in that department, thereby placing the opportunity for education within the reach of the poorest.

BIBLE CHAIR.—The importance and value of liberal endowment for this chair needs no argument. It is very gratifying to learn that during the past year the sum of one thousand dollars has been added to this fund by the bequest of Elder Michael Good, of the Flat Rock congregation, Va. It is very much to be desired that a sufficient endowment be secured for this department, so that

students may be encouraged to pursue Bible study by not having to pay a cent of tuition.

The following form of bequest should be used:

"I give and bequeath to the Trustees of Bridgewater College the sum of Dollars (\$....), which shall be used for the following purpose, to wit (here describe the purpose for which it shall be applied.)

(Name).....(Seal)."

SCHOLARSHIPS AND PRIZES.

MISSIONARY SOCIETY SCHOLARSHIP.—A scholarship worth \$45 is given each year by the Missionary Society of the College to some worthy student in the Bible Department.

ALUMNI SCHOLARSHIP.—The Alumni Association of the College has provided for scholarships in the different departments. Considerable endowment has been given to this end. Probably there will be one of these scholarships offered for the session 1906-07 in the Commercial Department.

Through the generosity of the friends, the College is enabled to offer assistance to a limited number of needy students. Candidates for this aid should make a written request, furnishing proper credentials.

Opportunities for service in connection with the College are provided in as many instances as possible for needy students. Students who desire to earn part of their expenses should apply to the secretary of the College. Opportunities of this kind are limited.

In this connection, we take opportunity to remind the friends of the institution of the importance of endowing more scholarships, in order to aid worthy and promising young people who would not otherwise be able to pursue college courses.

SOCIETY PRIZES.—The Victorian and the Virginia Lee literary societies offer each two prizes to its best declaimer and reciter, respectively.

SOCIETY TROPHY.—The societies have united in the purchase of a silver trophy with a mahogany back. The trophy has space for the inscription of forty names. The societies contest for this annually, and the winner of the contest has the right to exhibit it in his hall until it is won by a member of the other society. The name of the winner of the trophy is inscribed on it from year to year.

MAGAZINE PRIZES.—*The Philomathean Monthly* offers three prizes. A \$5 prize for the best original poem; a \$5 prize for the best original story, and a prize of \$10 for the best original essay.

ELOCUTION PRIZE.—A prize of \$5 is offered in the regular or special Elocution classes. The conditions of its award will be made known at the opening of the session.

UNIVERSITY SCHOLARSHIPS.—The University of Virginia offers an annual scholarship to a B. A. graduate of this institution who desires to do graduate work at the University. This scholarship is conferred by the University upon the recommendation of the College.

Washington and Lee University offers a B. A. graduate of Bridgewater College a scholarship in the graduate school, who becomes a candidate for the M. A. degree, or to a B. A. graduate of this College entering the Department of Engineering in that University.

SELECT A COURSE.

EVERY STUDENT SHOULD SELECT A COURSE. IT IS INFINITELY BETTER TO BEGIN ONE'S STUDIES AND SCHOOL LIFE WITH SOME DEFINITE COURSE IN VIEW THAN TO WORK WITHOUT A PLAN. OFTEN MONTHS OF PRECIOUS TIME ARE NEARLY SQUANDERED BY STUDENTS BECAUSE THEY HAVE NO DEFINITE IDEA WHAT PLAN TO PURSUE IN EDUCATION.

PHYSICS.

CLASS A.

This is an elementary course in Mechanics, Heat, Sound, Light and Electricity. The student who undertakes this course should have an elementary knowledge of Algebra. Each student will be required to perform a selected number of simple experiments in the laboratory.

TEXT: Avery's School Physics.

CLASS B.

The work done in this grade covers more fully the subjects studied in Class A. This course requires a good working knowledge of Algebra, Plane and Solid Geometry, Trigonometry, and Analytic Geometry. A carefully graded course of experiments must be performed by each student.

TEXT: Carhart's University Physics, or Hastings and Beach's General Physics.

CLASS C.

This course is taken up with a careful study of Sound and Light. One term will be given to Sound and two terms to Light. Students who undertake the course must have a knowledge of Mathematics equivalent to that required to pass Class B₃ in this College.

Suitable texts will be announced when the class is organized.

CHEMISTRY.

CLASS A.

This course briefly covers the subject of General Chemistry, and is completed in three months. About eighty experiments must be performed, and careful notes be made of them by each student.

TEXTS: Williams's Elements of Chemistry; Williams's Laboratory Manual of General Chemistry.

CLASS B.

This class devotes three terms to the study of General Chemistry. Much attention is given to laboratory work. Each student must perform about one hundred and fifty experiments. This course aims to cover the subject of General Chemistry in a thorough manner.

TEXT: Remsen's Elements of Chemistry.

CLASS C.

This course will be given to the study of Chemistry as applied to the purposes of mankind. It is a subject of absorbing interest to the student of Chemistry. The course begins with a study of the processes by which metals are extracted from their ores. Then follows the study of the manufacture of chemicals, of porcelain ware, of leather, of soap, of paper, of cotton goods, of sugar and of a number of other articles which have so much to do with our comfort and happiness. Students who enter this class must have a good knowledge of General Chemistry.

Dana's Manual of Geology is used as a text, and Geikie's Text-book of Geology as reference. The college museum is used frequently, and original papers on the geology of the surrounding section is required. In this course lectures are given on the principles of Mineralogy, including Crystallography and Determinative Mineralogy, amounting to a fair introduction to these subjects, whereby the student may be able to detect the more common minerals.

ASTRONOMY.

CLASS A.

This course is intended to give a brief yet clear introduction to the subject of Astronomy. The time required to complete this course is three months, and the elements of the science are brought before the student as clearly as possible in so short a time. Young's Lessons in Astronomy is used. This course is required of all who complete the English-Scientific course.

CLASS B.

CLASS B.

The aim of this course is to give such knowledge of Biology as to meet the requirements of a general education. The work is embraced under two heads, Zoology and Botany. About a half year is given to each subject. It is required that at least fifty local plants be collected and identified by each student. In Botany the text used is Atkinson's Elementary Botany, or equivalent, and Wood's field work. In Zoology some such work as Jordan and Kellogg's Animals or Parker and Hashwell's Text-book of Zoology is used. TEACHERS' NORMAL.

A special Teachers' Normal will be conducted by the College Faculty and others during the last ten weeks of the spring term. The advantage derived from attending such a school is to be measured not only by the increase in one's stock of knowledge, but also by the enthusiasm and energy for work that are sure to be gained by the association with scores of earnest teachers and students. If one lives in an atmosphere of thought he must think: as he becomes better or worse for the air he breathes, so the spirit of literary aspiration is contagious; therefore, no student or teacher—and the real teacher never ceases to be a student—can afford to miss the opportunity of mingling with his fellows who are alive

to progress. Teachers of the public schools will find this Normal of the greatest value, and are heartily invited to join us. Write for the special circular about February 1, 1906.

THE COMMERCIAL DEPARTMENT.

COMMERCIAL DEPARTMENT.

The purpose of this department is to scientifically prepare young men and women to conduct intelligently the affairs of the business world. A broad and practical training in business methods is necessary to the person who would most rapidly attain business success. Thousands fail annually through a lack of business training, and as our rapidly increasing commercial interests continue to develop, the demand for well-trained young men and women to take charge of the business of our country increases.

So thoroughly commercial has our country become that there is no calling in which a knowledge of business is not demanded. A man must either possess this knowledge himself, or he must suffer for the ignorance and carelessness of those whom he trusts. From the shortness of the time required to obtain a practical knowledge of business principles, one would suppose that both young men and women would avail themselves of the opportunities offered by our numerous business colleges. The main drawback has been the cost in obtaining a business education. Few young people can afford to pay \$150 or \$250 for three or four months' training. Business colleges giving instruction in this one line of work, and having no other means of support, are usually located in large cities, where the enormous rent and the expense of living compel them to charge high rates of tuition.

Realizing the great demand for trained helpers, we call the attention of young men and women to the excellent opportunities we offer of acquiring a complete business education at a cost that places such training within the reach of all. Our courses take rank with those of any of the leading commercial colleges and include all that is necessary for a first-class business education.

This school offers three courses: (1) The Business Course, consisting of the regular lines of training for business life; (2)

The Combined Course, an extended course of training, intended for those preparing to teach and for those seeking a more complete equipment for financial and commercial pursuits; (3) The Shorthand and Typewriting Course, intended for office helpers and amanuenses.

QUALIFICATIONS FOR ENTERING.—If a student is found deficient in any study he will receive special instruction until he is able to enter the regular classes, but will not be permitted to do so until he has the necessary preparation.

For convenience in classification the work is divided into three sections. The first is section A, which includes the beginning classes in the regular preparatory course. This is introductory to the regular commercial courses, and may be entered without examination. The second is section B, which includes the Business Course and the Shorthand and Typewriting Course. To enter this section, students must first pass an examination covering the work included in section A, or furnish satisfactory certificates showing equivalent work completed elsewhere. The third is section C, which includes the second year of the Combined Course. To enter this section, students must first pass an examination covering both of the preceding sections in full, or furnish satisfactory certificates showing equivalent work completed elsewhere.

BOOKKEEPING.—This constitutes the framework of the Business Course. In this department books are actually opened, conducted and closed by the student. A great variety of business is represented and conducted by the most modern, most progressive and most approved methods. The student not only makes himself thoroughly acquainted with the Science of Accounts, but is drilled in the practical application of the principles of this science to the various forms of business in the commercial world. The

work, therefore, is properly divided into two departments, Theoretical and Practical.

In the Theoretical Department the student is thoroughly grounded in the principles of bookkeeping and double entry. He becomes acquainted with the forms of negotiable paper and the laws pertaining thereto; with the nature of ordinary business documents, and the forms and uses of books. The technicalities of bookkeeping are explained, and the student is taught how to adapt labor-saving books to special kinds of business. He learns to record business transactions in the various books, becomes familiar, with principles of journalizing, posting, closing the ledger, making off balance sheets and statements showing the results of the business.

In the Department of Business Practice, the student is taken through a course of business transactions, which is a most real and practical representation of actual business, in which he buys and sells merchandise, deposits money, discounts notes, receives and makes shipments, makes and pays acceptances, etc. It embraces the keeping of a practical set of books, the drawing of all kinds of documents, such as deeds, mortgages, leases, powers of attorney, co-partnership and other contracts, notes, drafts, checks, receipts, advertisements, etc.

For the use of students in this department there are two divisions or sets of offices, known as "Chicago" and "New York" located at opposite sides of the building. Intercommunication between the two divisions is established and all business between the manuscript student and offices of the opposite divisions is conducted by correspondence just as completely and effectively as though they were five hundred miles apart. Each set of offices consists of the following: Shipping and Post Office, Real Estate and Insurance, Commission, Wholesale and Banking.

Each student, after completing the other work of the course, takes the various positions in these offices, in turn, finishing his work in the College Bank as bookkeeper, teller and cashier, respectively, thus learning banking in the most thorough and practical manner possible. Our offices are supplied with such books and stationery as are found in the best business houses. Each student pays a fee of \$2.00 on entering the actual business depart-

ment. This is not for tuition, but for office books and expenditures.

COMMERCIAL LAW.—No man can afford to enter the broad arena of business without a knowledge of his commercial rights and duties. It is our aim to acquaint the student with those features of law which every business man should know, and without a knowledge of which he is at the mercy of sharpers and business tricksters.

COMMERCIAL ARITHMETIC.—Particular attention is paid to those parts of Arithmetic which are especially necessary to the business man. Not only are rules and principles taught, but, what is infinitely more important, thorough drill is given in applying them with the greatest rapidity and accuracy.

LETTER WRITING.—The business of this age being so largely conducted by letter, a knowledge of business correspondence is simply imperative, and a student can not attach too much importance to this part of the work. Many a young man has failed to secure an important position on account of some blunder in his application, due to ignorance of this subject.

BUSINESS FORMS.—Many swindles would be prevented if a knowledge of business paper were more generally diffused. We aim to thoroughly familiarize the student with the construction and use of the various forms of commercial paper, and with the laws governing the same.

PENMANSHIP.—Good penmanship is its own advertiser, wears its value on its face. A good handwriting often proves a stepping-stone to a lucrative position. Indeed it is an indispensable aid to every one, whatever may be his position in society. We teach the most practical system of rapid writing. While students are divided into classes, they at the same time receive individual instruction. Particular attention is paid not only to movement, analysis, spacing, shading, etc., but also to the correction of errors and the best way to avoid them.

COMMERCIAL GEOGRAPHY.—Scarcely any subject connected with commerce is more interesting than this. Just now the acquisition of islands by our government, the extension of our trade,

the competition between our Gulf and Eastern ports, and many other matters of commercial interest are attracting the attention of the business men of the entire country.

SPELLING.—Every college student ought to be able to spell all ordinary words correctly. As a matter of fact—let it be regretted—few are able to do so. Experience has shown us the importance of this subject, and therefore we lay great stress upon it. The standard for passing the subject is an examination grade of 90 per cent.

WHEN TO ENTER.—Since the instruction is largely individual, students may enter at any time. It is desirable, however, to enter at the opening of a term.

The time required to complete the Business Course is from two to three terms, according to the ability, application and previous advantages of the student. Those who are prepared to take this course in less than the allotted time will not need the two full years to complete the Combined Course.

As each student receives *individual instruction*, especially in bookkeeping, his progress is not retarded by less apt or less industrious students, nor is he forced on by those who are able to make more rapid advancement.

OUR COMMERCIAL ROOM.—A large new room has been fitted up especially for the Commercial Department. It is well lighted from the rear and two sides, the students all facing one way—toward the unlighted side of the room. We have placed in the room twenty-five good, substantial tables, besides teacher's desk, all finished in oak and trimmed with green oil-cloth. The tables are all of the same size, and have drawers for students' books, stationery, etc. The chairs, blackboards and other furniture of the room make it inviting and convenient in every respect. In the rear of the room are offices for the Practical Department. These are arranged like those found in the leading business colleges. The offices, as we have them at present, have inscribed over the arches in front the following names: "New York College National Bank," "Post Office," "Trans-continental Shipping Co.," "Commercial Emporium," "National Wholesale Co.," "Central Commission Co.," "N. Y. & C. R. R. Co.," "Carey & Co., Insurance,"

"B. C. Chase Real Estate Co." This room is second to no commercial room in the Valley, and is as well equipped as those ordinarily found in exclusive business colleges.

SHORTHAND AND TYPEWRITING COURSE.

Fall Term.—Shorthand, Typewriting, Grammar and Composition, Correspondence and Spelling.

Winter Term.—Shorthand, Typewriting, Grammar and Composition, Commercial Law and Penmanship.

Spring Term.—Shorthand, Typewriting, Grammar and Composition, Office Practice, Operating Letter Press, Carbon Work, Mimeograph, both Typewriting and Longhand, and practice in the careful keeping of Letter Files, Business Forms.

TEXT-BOOKS: Ben Pitman's Manual of Phonography; Hardcastle's Word-Signs; Palmer's Expert Reporter; Musick's Universal Dictation Course; Mosher's Complete Typewriter Instructor; Reed and Kellogg's Higher Lessons in English; Loomis's Letter Writing; Lyons's Commercial Law.

The varied uses of Shorthand are so well known, and its benefit so fully recognized by business and professional men, that we deem it unnecessary to dwell at length on the importance of gaining a practical knowledge of the art.

We teach the American Pitman system of phonography, using Ben Pitman's Manual, and Palmer's Reporter's Companion, which

is strictly Pitmanic. The teacher in this department, however, introduces such contractions and expedients as he has found to be of advantage in actual practice.

Typewriting, going hand-in-hand with Shorthand, will receive its due share of attention. It has been remarked that the commercial world is making stronger demands today for competent typewriters than ever before, hence the necessity of careful preparation to meet the demands. After the student has acquired good, accurate fingering, and has learned to manipulate the machine, he will have letters, speeches, court work, etc., dictated to him, and will be instructed in making proper transcripts of his notes. Both touch and sight systems are taught. We use the Remington and Universal Hammond typewriters.

The time required to learn Shorthand varies greatly with different students. It depends upon the aptitude of the student, upon the efforts he puts forth, and also upon his previous education and training. If he possesses average ability and industry he may possibly be prepared for an amanuensis in six months. Some take a year or more. Very few will be able to graduate in this course in less than a year.

For an amanuensis diploma the student will be required to write from *new matter* at the rate of 90 words per minute, and transcribe his notes on the typewriter at the rate of 30 words per minute.

If the student does not possess a satisfactory knowledge of Penmanship, Orthography, Practical Grammar and Correspondence, he will be required to study these subjects before entering this department.

Students who enter for the Shorthand and Typewriting Course will not be permitted to take studies outside the course except by the consent of the Faculty.

THE MUSIC DEPARTMENT.

MUSIC DEPARTMENT.

COURSES FOR TEACHERS, SINGERS AND INSTRUMENTAL PERFORMERS.

This department provides fundamental training in the main branches of Music. Besides bringing the pupils to a high degree of accomplishment we prepare ladies and gentlemen for an active career in the profession of teaching music. No young lady's education is now complete without a knowledge of vocal and instrumental music such as our courses provide. Leading educators believe that music is a necessary factor in æsthetic development. This need and demand we are prepared to meet.

The lessons for the Reed-organ, Piano, Violin and Voice Culture are given either privately or in classes of two. The methods used are the best ones the teachers in charge have been able to secure from the best sources. Vocal Music, Chorus Singing, Ear and Eye Culture, Harmony, Theory, History and Methods of Teaching are taught in classes of suitable numbers.

MUSIC TEACHERS' COURSE.

The Teachers' Course requires two sessions, and it is intended to qualify for a musical career in conducting and teaching in musical institutes, normals, schools, etc. The study of harmony, instrumental music, and voice culture in this course, is pursued from the beginning to the close. These develop one to the ability of composing music, singing and playing in an artistic style.

FIRST YEAR.

Fall Term.—Vocal Music; Introductory Theory of Music; Solfeggio (Ear Training and Sight Singing) [3]; Lessons on Organ; Voice Culture.

Winter Term.—Vocal Music and Part Singing; Solfeggio (Ear Training and Sight Singing) [5]; Lessons on Organ; Voice Culture.

Spring Term.—Preparatory Chorus Singing; Harmony; Lessons on Organ; Voice Culture.

SECOND YEAR.

Fall Term.—Preparatory Chorus Singing; Harmony; History of Music; Lessons on Organ or Piano; Voice Culture and Art of Singing.

Winter Term.—Chorus Singing; Harmony and Composition; History of Music; Lessons on Organ or Piano; Voice Culture and Art of Singing.

Spring Term.—Oratorio Singing; Harmony and Composition; Methods and Directing Practice; Lessons on Organ or Piano; Voice Culture and Art of Singing.

NOTE.—*In the Music Teachers' Course, Piano may be substituted for Organ in both years, or Violin may be substituted for Voice any two terms.*

PIANO COURSE.

The Music Teachers' Course with two years additional Harmony and Composition and the following Piano studies or their equivalent constitute the Piano Course.

FIRST YEAR.

Hand Formations; Memorizing.

Exercises—Schmitt-Faelten; Kohler Op. 157; Duvernoy Op. 176; National Graded Course. Easy Pieces and Sonatinas from Kuhlau, Lichner and others.

SECOND YEAR.

Technical Exercises; Scales; Memorizing.

Studies—Schmitt-Faelten; National Graded Course; Schumann Op. 68. Sonatinas from Mozart, Clementi, and Kuhlau with suitable pieces.

THIRD YEAR.

Technic and Arpeggios; Memorizing.

Etudes from Czerny; Bach's Two-part Inventions; Mason's

Touch and Technic, Book III; Octave Studies; National Graded Course. Selections from Beethoven, Bach, Haydn, Schumann and others.

FOURTH YEAR.

Mason's Touch and Technic, Book III, continued; Octave Studies; National Graded Course; Accompanying; and Bach's Three-part Inventions begun. Concert selections from Beethoven, Rubinstein, Moszkowski, Mendelssohn, Henselt, etc.

POST-GRADUATE COURSE IN PIANO. (ONE YEAR.)

Octaves, Arpeggios and Difficult Etudes, continued.

Building Repertory from Beethoven, Raff, Brahms, Liszt, Chopin, etc.

VOICE CULTURE COURSE.

It is through the power, quality and method of using the voice that the hearer is impressed. Singing, without a correct habit of breathing or method of tone-production, is ruinous and leads to deformities of the vocal muscles and often results in laryngeal troubles and diseases of the throat.

Inasmuch as it is somewhat difficult to outline a course for Voice Training and Art of Singing, the studies given below may be looked upon as a working outline rather than as a fixed course; nevertheless, they will be followed in order as nearly as the requirements of the student will allow. The Music Teachers' Course in connection with the following three years' outline for the voice, constitutes the Voice Culture Course.

FIRST YEAR.

Fall and Winter Terms.—Principles of Breathing, Voice Production, Placing and Elementary Vocalization.

Spring Term.—Breath Management, Resonance, Enunciation and Articulation, Sieber's Eight-measure Exercises.

SECOND YEAR.

Fall and Winter Terms.—Vocalization, Physical Culture, Sieber's Vocalizes and Songs of Easy Compass.

Spring Term.—Vocalization, Interpretation, Concone's Exercises.

THIRD YEAR.

Entire Session.—Vocalization, Concone's Most Difficult Exercises, Suitable Songs and Arias from the Oratorios.

PUBLIC SCHOOL MUSIC COURSE.

Considerable musical ability should be acquired before this course is begun. For students well prepared, and possessing natural teaching ability, the course requires about six months. It is designed to cover eight or nine years in the public schools. The work in the study of this course consists in the going over of the materials of teaching,—showing what to teach and how; fixing the principles in proper order in the teacher's mind.

For most pupils, it would be well to spend a session on this course, and pursue in connection with it the Teacher's Course.

THE VIOLIN.

Arrangements are being made to supply an up-to-date teacher in this branch. No outlined course is yet ready, but regular development and practical work may be expected. Write for further particulars.

NORMAL EXTENSION COURSE.

We have arranged a special twelve weeks' spring Normal Course for teachers and those preparing to teach, and who find it inconvenient to attend before the spring term. This session begins at the opening of the spring term.

The course will consist of Theory, Harmony, Methods of Teaching, Ear-training and either Junior or Senior Vocal Music or both.

LESSONS IN CLASSES OF TWO.

Voice Culture, Piano, Violin and Organ may be studied in classes of two: This plan curtails expenses and often gives the

pupil better advantages than private instruction. No one is held back because of others; each pupil has his own studies and pieces; and although he does not practice the lesson of his classmate, he nevertheless by hearing it recited learns his music in addition to his own. It really amounts to a private lesson before others, which enables one to play or sing with ease and grace, in society or in public. By this system "emulation is stimulated as ability is matched with ability, mind comes in contact with mind, and intellect is sharpened with intellect." Seeing others overcome difficulties inspires us to overcome our own.

PRACTICE CLAVIER.

The Virgil Practice Clavier is a toneless instrument with keyboard same as piano. In the mastering of technical difficulties it is to the piano pupil what a picture book is to the child. It is endorsed by the leading teachers of our country and used by our highest institutions. When used rightly it insures success. One can memorize more rapidly and more accurately at the Clavier than at the Organ or Piano. In the study of harmony it necessitates thought and attention.

REMARKS.

Students who pursue the Music Teachers' Course, or the Piano Course, are required to study Grammar, Arithmetic, Rhetoric and Elocution, unless they already have good grades in these branches.

Candidates for diplomas in the Piano Course or the Voice Culture Course must perform successfully in public at least twice.

Diplomas are awarded to persons who complete satisfactorily the following courses: (1) The Piano Course; (2) The Voice Culture Course; and (3) The Music Teachers' Course.

The department has been equipped with modern instruments, including a Stieff Concert Grand Piano. These are placed in comfortable practice rooms for instrumental students.

In preparation for public performances, pupils who are sufficiently advanced are expected to appear in public in the "pupils' recitals."

All lesson periods are forty minutes.

Students are expected to be punctual at their practice periods, lessons and classes.

No student will be permitted to loiter in or about the Music Rooms or intrude in any way upon others while practicing.

The instruments in Stanley Hall may be used only by those who take instrumental lessons.

Students should bring with them such sheet music, instruction books and etudes as they may have on hand.

MUSIC DEPARTMENT EXPENSES.

All expenses are due and payable one term in advance. For attendance less than a term tuitions will be charged at month rates. No deduction is made for absence of less than two weeks.

GENERAL INFORMATION.

No student will be permitted to board out of College, except by written permission of the President and at boarding houses regularly licensed by the College.

All students boarding in College are required to attend Chapel, Bible Classes Sabbath afternoon, and preaching in Chapel Sabbath evenings.

Students will furnish their own towels, napkins, window curtains and an extra pair of blankets for winter use.

Students are responsible for damage to furniture and buildings caused by them.

Running, whistling, scuffling, loud talking or any other rude or boisterous conduct in the buildings is not expected.

The use of tobacco in the buildings or on or near the grounds and profane language are forbidden.

The order of the church, in relation to church membership, plainness of dress and Christian deportment will be expected of all who are members. They will also bring with them their certificates of membership and connect themselves with the congregation here during their stay among us.

Students should have "College" written on all letters and packages sent them, to insure prompt delivery.

Experience strongly urges the Faculty to ask parents and guardians to discourage excessive visiting of students to friends and relatives in reach of the College, for this greatly interferes with their progress and advancement.

Students who prefer to ride from the depot to the College will find carriages in attendance, fare ten cents.

At the ringing of the bell for study, students shall immediately repair to their rooms.

Students must be prompt and regular in attendance upon their classes. Permission to be absent should be obtained before the absence occurs.

To every student the Faculty extends a hearty welcome. Come with the determination to study hard and to make improvement your first and great object. Be patient, good natured, energetic, industrious and persevering.

All correspondence and applications for catalogues should be addressed to Bridgewater College.
